KWF Kankerbestrijding was founded to, next to what the government undertakes, make extra efforts for combatting cancer possible. KWF operates on donations done by the population alone. Many individual wishes to 'do something about cancer' are gathered via KWF into a mighty fist. By donating to KWF, the Dutch population finances about half of all the cancer research in Netherlands. Through your donation and that of other pensioners, Philips Pensioenfonds donates over € 100,000 to KWF.
